I'm guessing that you saw this, but just in case you haven't it and it contains anything helpful.

Hello everyone – This is a Fact Sheet developed by WEF at the request of CWEA, as indicated below. I would like to really thank Elizabeth Allan, David Greenwood, Todd Jordan, Jon Hay and the entire CWEA biosolids committee for their unwavering support and hard work on this! Obviously WEF deserves tremendous thanks as well. It is hoped that you find this document useful in public outreach and education efforts. Please let me know if you have any questions or comments. Thanks - Greg

Subject: WEF Land Application/Composting Fact Sheet

Todd & Elizabeth,

Attached is a PDF of the nationally-recognized fact sheet on land application and composting of biosolids that you requested from WEF. I will add this to the other communications resources that are available in the biosolids channel of Access Water Knowledge on the WEF Web site. I apologize but I do not have ready access to the email addresses of everyone who was involved with this request so I would appreciate it if you could please forward to Darren Greenwood and others. I hope that this resource meets your expectations and is useful in your efforts to educate the public, media and local officials. Thank you again for the assistance in the development process and please let me know if you have any questions.

Have a nice weekend,
Lori
